“DARE TO DREAM – PREPARE TO WIN”

H. K. E. Society's Sir M Visvesvaraya College of Engineering, Raichur, organized a two-day motivational and personality development program titled “Dare to Dream – Prepare to Win” on 5th and 6th October 2026 for the First Year Engineering students. The program aimed to motivate students to dream big, develop a positive attitude, understand the importance of effective time management, and set clear and achievable goals for their academic and personal growth.

The program was conducted by Dr. Jaganath Rao, International Motivational Speaker, who engaged the students through an energetic and interactive approach. The program commenced with a warm welcome to the dignitaries, faculty members and students. Dr. Gurunath K. B. delivered the welcome address and extended greetings to all the participants. Prof. Shwetha introduced the resource person, Dr. Jaganath Rao, highlighting his experience and expertise as a motivational speaker and mentor.

The program was formally inaugurated by Prof. Suresh Patel, First Year Coordinator, who encouraged the students to actively participate in the sessions and make the best use of the opportunity. The Principal presided over the inaugural function and addressed the gathering, emphasizing the importance of motivation, discipline, goal orientation and a positive mindset in the life of an engineering student.

Dr. Jaganath Rao conducted highly interactive and engaging sessions for the first-year engineering students. His sessions focused on developing the students' confidence, clarity of purpose and willingness to take responsibility for their future. A major component of the programme was Time Management, where students were introduced to practical ways of planning their daily activities, prioritizing tasks, avoiding procrastination and making effective use of their time.

The speaker also conducted Goal-Setting activities, encouraging students to identify their aspirations, define clear goals and develop an action-oriented approach towards achieving them. The sessions were made lively through fun activities, interactive exercises, student participation and motivational stories. These activities helped students understand important life lessons in an enjoyable and memorable manner. The motivational stories and real-life examples shared by Dr. Jaganath Rao inspired students to overcome fear, develop self-belief and prepare themselves to face challenges with confidence. The presence and active participation of all the faculty members added to the success of the programme and provided strong encouragement to the first-year students.

The program concluded with a valedictory session. Vice-Principal Prof. Smita C. Chetti addressed the gathering and appreciated the efforts of the resource person, faculty coordinators and students in making the program successful. She encouraged the students to put into practice the lessons learned during the two-day program, particularly in the areas of time management, goal setting, discipline and positive thinking.

Prof. Manjula proposed the Vote of Thanks, expressing gratitude to the Management, Principal, Vice-Principal, resource person, faculty members and students for their valuable contribution and participation. The program was hosted by Prof. Ashwini and Prof. Saroja, who coordinated the proceedings smoothly throughout the event.

The two-day program was highly successful and received an enthusiastic response from the first-year engineering students. The interactive activities, motivational stories and practical exercises helped students understand the importance of:

- Setting clear and realistic goals
- Managing time effectively
- Developing self-confidence and a positive attitude
- Overcoming fear and hesitation
- Taking responsibility for personal growth
- Preparing systematically for academic and career success

The program provided the first-year students with valuable motivation and practical strategies to begin their engineering journey with clarity, confidence and determination.

The “Dare to Dream – Prepare to Win” program was an enriching and motivating experience for the first-year engineering students. The engaging sessions by Dr. Jaganath Rao, combined with fun activities, goal-setting exercises, time-management activities and inspiring stories, created a positive learning environment. The program successfully reinforced the message that dreams become achievable when supported by clear goals, disciplined time management, consistent effort and the determination to succeed.
